Description

GARMIN HRM-SWIM heart rate monitor, specific for swimming, works in water

Compatible with 920XT, FENIX3, EPIX models

- Specifically made for pool swimmers
- Non-slip and perfectly hydrodynamic band
- Stores and sends heart rate data to compatible devices

This innovative band is specifically designed for use in the pool; the particular structure makes it hydrodynamic, light and non-slip and remains perfectly adherent to the body even during turns. Once you have finished your training and exited the water, the frequency data stored by the central module are sent to the device, such as the Forerunner 920XT, which you keep in your sports bag.

Physical characteristics

- Unit dimensions (WxHxD): 58.0 - 145.0 x 3.8 x 1.2 cm
- Band and module weight: 72 g
- Module dimensions: 29.4 x 51.4 x 8.5 mm
- Size adjustment: yes
- Band range: 58.0 - 145.0 cm
- Battery: CR2032
- Battery life: 18 months (3 hours of swimming per week)

- [Waterproof classification](#) : 5 ATM

Additional features

- ANT+® heart rate: yes
- Supports advanced heart rate features and cardio variability: No
- 2.4GHz ANT wireless communication protocol: Yes
- Running dynamics: no
- Store and send heart rate: yes
- Heart rate statistics during swim interval: yes
- Non-slip and hydrodynamic design for swimming pool: yes
- Chlorine Resistant: Yes
