### Description

PAIR OF CARBON WHEELS VISION METRON 30 SL DISC

This handcrafted wheel leverages Vision's carbon manufacturing know-how combined with cutting-edge manufacturing processes.

This extremely aerodynamic and stable wheel was developed through extensive CFD analysis and wind tunnel testing.

The preload reduction system (PRA) offers greater smoothness to the wheel and longer life than standard.

## Description

Metron 30 SL Disc clincher/TL 100% reflects the personality of the VISION wheels: that of beating the wind, in every competition and on every terrain. Even uphill, best supporting the needs of cyclists looking for maximum aerodynamic performance. This wheelset carries with it the genes of the Metron family, with all the top-of-the-line features that come with it. Starting from the hubs equipped with the PRA bearing preload adjustment system, which offers greater smoothness to the latter and a longer life than the standard.

Characteristics

- Carbon rim
- Profile: 30mm
- Tubeless ready - clincher (Max: 7 bar; 100 psi)
- PRA hubs for straight pull spokes
- ISO 6-Bolts Rotor Mount
- Centerlock rotor support
- 6 cartridge bearings (2F + 4R)
- 2:1 aerodynamic flat spokes (21 front / 24 rear)
- ABS self-locking nipples
- Made entirely by hand
- Includes QR-93, brake pads, valve and tape for TLR, spoke protector and wheel bag
- Includes adapters for front: QR and TA-15; rear: QR
- Shimano 10-11S aluminum body included
